PROFILE

Software Engineer and Information Technology undergraduate at the University of Moratuwa, currently building real-time web and mobile products at WIWIS.AI. Comfortable across the stack with React, Next.js, React Native, Node.js, REST APIs and PostgreSQL, with hands-on experience delivering real-time, multi-tenant and AI-powered systems from database design through to deployment.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, C

Frontend: React.js, Next.js, React Native (Expo), Redux Toolkit, React Query, TailwindCSS, Vite

Backend: Node.js, Express.js, FastAPI, REST APIs, WebSocket / Socket.IO, JWT & Clerk Auth

AI / ML: LangGraph, RAG, Qdrant, OpenAI & Gemini APIs

Databases & ORM: PostgreSQL, NeonDB, MongoDB, Supabase, Redis, Prisma

Testing & DevOps: Vitest, Pytest, Docker, GitHub Actions (CI/CD), Git, Postman, Vercel, Render

WORK EXPERIENCE

Software Engineer — WIWIS.AI, Colombo

March 2026 – Present

- Built real-time WebSocket rider tracking with live map streaming across two React Native apps (Transfleet & Transfleet Rider), keeping rider and customer views in sync in real time.
- Collaborated with the team on deployment and end-to-end testing across both apps, validating live tracking behaviour on real devices ahead of each release.

EDUCATION

BSc (Hons) in Information Technology — University of Moratuwa

March 2024 – December 2028

PROJECTS

Enterprise Knowledge Assistant — Production-grade RAG + Agentic AI platform

[eka-23.vercel.app](#)

Next.js 15, FastAPI, LangGraph, Qdrant, PostgreSQL, Redis, Clerk, Docker

- Built a RAG + agentic AI platform over uploaded documents and websites, citing exact source chunks in answers.
- Built a multi-agent LangGraph pipeline (Planner → Retrieval → Verification → Generation) over reranked Qdrant search.
- Developed a FastAPI backend with PostgreSQL, Redis, MinIO/S3, Alembic migrations, pytest and multi-org RBAC.
- Shipped a Next.js 15 frontend with Clerk auth, React Query and an admin dashboard; containerised with Docker.

CrickScore — Multi-tenant live cricket scoring platform

[crickscore-seven.vercel.app](#)

React, TypeScript, Node.js, Express, MongoDB, JWT, TailwindCSS

- Built a multi-tenant platform where organizers run isolated tournaments and viewers follow live scores, scorecards and stats, with ball-by-ball scoring pushed in real time.
- Added JWT authentication with role-based access across three roles (viewer / organizer / super-admin) and an approval workflow for new tournaments.

Warehouse Management System — Goods lifecycle & quality control platform

[wms.vercel.app](#)

React 19, React Query, Node.js, Express, PostgreSQL (Neon), Prisma, JWT, Gemini API

- Built a full-stack platform tracking the goods lifecycle from receiving to dispatch, with real-time stock levels, a KPI dashboard and product search / filtering.
- Implemented a Quality Control module — inspections, defect logging, NCR Kanban boards and CAPA tracking — plus JWT auth with role-based access (Admin / Operator / Quality).
- Integrated a Gemini-powered AI assistant for natural-language warehouse queries; deployed the frontend on Vercel and the backend on Render.

Code_Collab — Collaborative real-time code editor

[live-codes.vercel.app](#)

Next.js, Monaco Editor, Socket.IO, PostgreSQL, Prisma

- Real-time collaborative editing with syntax highlighting via Monaco and live cursor sync over Socket.IO.
- Integrated the JDoodle API for in-browser code execution across four languages (JavaScript, Java, Python and C++).

LEADERSHIP & ACHIEVEMENTS

- Chairperson, Rotaract Main Website Project** — leading the planning and development of the official club website.
- IT Team, Organizing Committee — Road to Legacy 2.0** — contributed to the event website and registration systems.
- 3rd Place — CodeRush 2024, University of Moratuwa | Top 10 — Agentrix 2026 | Top 10 — IEEE Mora Extreme 2026
